I am happy to announce that the inaugural issue of International Journal of Mechanical and Industrial Engineering (IJMIE) is coming out May 2011. The field of mechanical and industrial engineering embraces a broad spectrum of technical activities including mechanical design and engineering along with the classical techniques of work methods, production and facilities research, manufacturing systems, and organization and management systems.

IJMIE will have a strong methodological approach to and application focus on mechanical and industrial engineering that will concentrate on various techniques and applications of to enhance their active role in the 21st century global market and enterprises. Industrial engineering is concerned with the design, improvement, and installation of integrated systems of people, materials, information, equipment, and energy. It draws upon specialized principles and methods of engineering analysis and design to specify, predict, and evaluate the results to be obtained from such systems.

IJMIE is a refereed international journal to be of interest and use to all those concerned with research in various fields of, or closely related to, mechanical and industrial engineering disciplines. It aims to provide a highly readable and valuable addition to the literature which will serve as an indispensable reference tool of years to come. The coverage of the journal includes engineering or any closely related fields. The Journal also encourages the submission of critical review articles covering advances in recent research of such fields as well as technical notes.

IJMIE is the premier forum for communication of new advances and research results in the fields of Mechanical and Industrial Engineering. This journal shall provide a platform to researchers, engineers and scientists in the domain of interest from around the world.

This issue contains sixteen articles in total from various parts of the country. I am sure the contributions by the authors shall add value to the research community. I welcome the researchers and M.tech scholars to contribute their research findings to IJMIE.

(Prof. R.K. Mishra)
